

Jaivel Aerospace - Speeding to growth!

Jaivel Aerospace of Mansfield have proved their growing reputation for excellence in manufacturing technology by working on the Bloodhound SSC project to break the land speed record and travel at 1,000 miles an hour.

Jaivel Aerospace is a tier 1 supplier to Rolls Royce & Boeing. Their growing reputation for excellence in Manufacturing and Tooling Technology led to them being invited to help design manufacturing process for critical components for the project.

BLOODHOUND SSC is a unique, high-technology project to design and build a car that will break the 1,000mph barrier and set a new world land speed record. Designed and constructed in the UK, BLOODHOUND SSC includes components and sponsorship from international companies and will make its record attempt in South Africa.

Jaivel Aerospace's success in providing manufacturing and tooling solutions to world leading companies is also helping them plan the next stage of their development - a 15k sq ft highly innovative manufacturing facility based in the D2N2 area. The Growth Hub and Mansfield DC are hoping to assist them with this significant expansion.

KEY POINTS

Support

Providing useful contacts and linking to other organisations to help with the company's growth plans.

Future applications for grant funding being considered.
